

# cocos2d-x-3.x + linux(ubuntu 环境)

by gaoming714@126.com

- 准备

cocos2d-x-3.3

glfw3

Ubuntu

- 安装库

\*\*\* synaptic (Ubuntu 可选, 后面安装方便)

build-essential(Ubuntu)

cmake

freeglut3-dev

libxrandr-dev

libxcursor-dev

libxinerama-dev

libglew-dev

libfontconfig1-dev

libcurl4-openssl-dev

写到一行:

build-essential cmake freeglut3-dev libxrandr-dev libxcursor-dev libxinerama-dev libglew-dev  
libfontconfig1-dev libcurl4-openssl-dev

- 安装 glfw3

glfw3# cmake . (注意这里有一个点)

glfw3# make

glfw3# make install

- 配置 cocos

cocos2dx# ./setup.py

cocos2dx# source /root/.bashrc

- 测试 cocos

workDir # cocos new Newproj -p com.Newproj.www -l cpp -d .

WorkDir # cocos run -p linux
